

# Zero-trust Security Solutions

## About MAMORI.IO

**Mamori.io** is an Australian software company that delivers high performance zero-trust security solutions for any sized team or organization that is looking to better manage access and privacy compliance for their cloud and on premise infrastructure. The mamori server and services can be deployed on-premise or in the cloud

**Businesses** can prevent ransomware and other attacks due to unauthorized access by multi-factoring access to applications ( SAML/No-SAML), databases, servers and other critical IP resources

**Internal and external users** can access applications, servers and databases via role based access policies that protect your business from data breaches and help it meet compliance regulations.

**Administrators** get centralized access provisioning, activity monitoring and auditing of all HTTP, IP, SQL, RDP, SSH and SFTP activity.

**Privacy officers** can implement granular zero-trust controls over the client connection, statement execution and masking/encryption of data.

 <b>COMPREHENSIVE</b> Secure web applications, direct database, server access and any other IP resource.	 <b>MONITORED &amp; AUDITED</b> Activity is monitored and audited across all databases and servers by identity.	 <b>COMPLIANT</b> Meets technical safeguards for all major security and data privacy regulations.
--	---	---

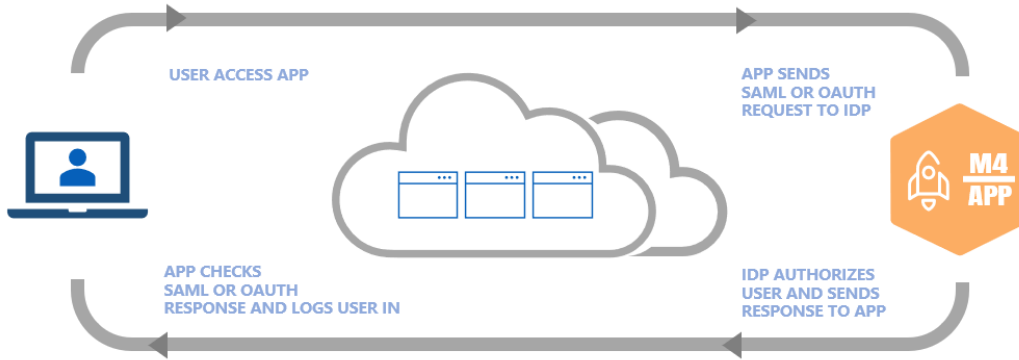

Module/Service	Features	Benefits
<b>M4APP</b> SAML & OAuth provider	SSO & 2FA SAML enabled cloud and on premise applications	<ul style="list-style-type: none"><li>Integrated multi-factor login authentication across services and applications.</li></ul>
<b>M4APP</b> HTTP Proxy	2FA applications that are <b>not</b> SAML enabled	<ul style="list-style-type: none"><li>No changes to applications required</li></ul>
<b>M4IP</b> Zero trust network access	2FA access to any IP address. For applications, databases, desktops, IoT, RDP and other IP resources.	<ul style="list-style-type: none"><li>No SAML or HTTP proxy integration required</li><li>Protect against network penetration attacks</li></ul>
<b>M4PAM</b> Databases & Servers	SSO and 2FA direct database, RDP, and SSH server access.	<ul style="list-style-type: none"><li>Low cost privileged access management (PAM)</li><li>Agentless and no changes to servers and databases required</li></ul>

# Zero-trust Security Solutions

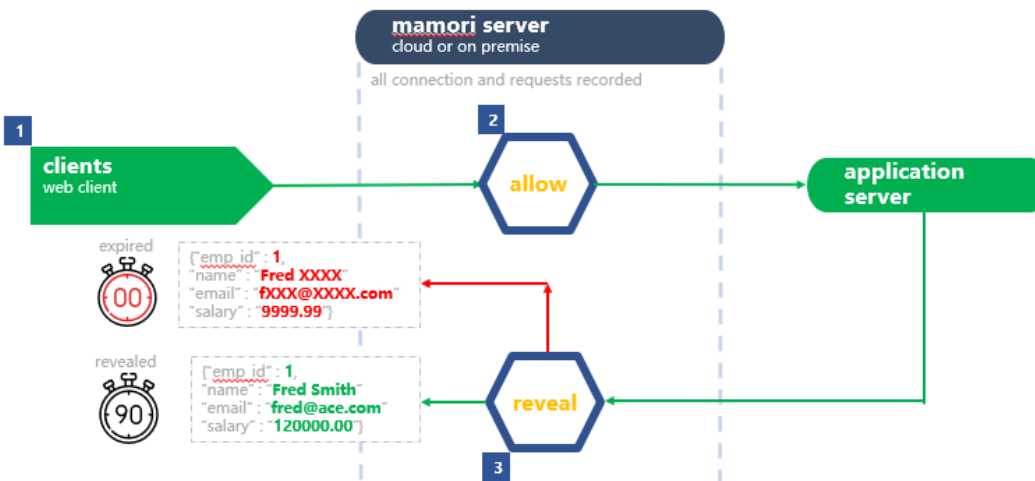

About MAMORI.IO

## Protect SAML enabled applications – SSO/2FA application access

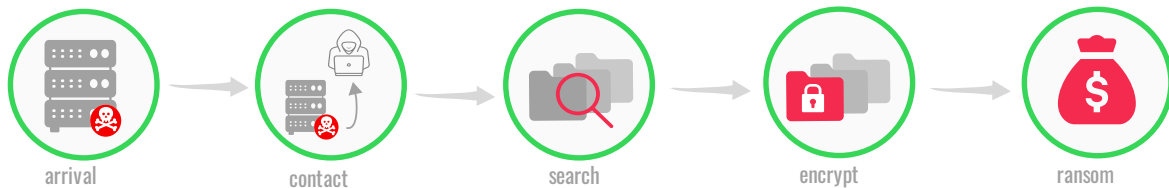

## Protect data and applications not SAML enabled – SSO/2FA & masking

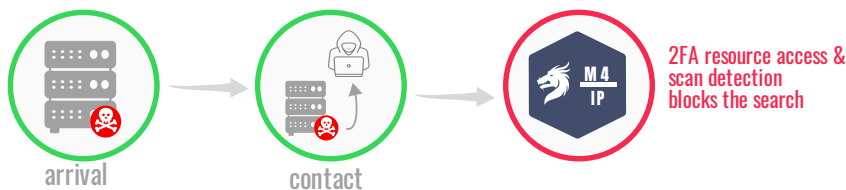

## Protect against network penetration attacks – intrusion detection

### RANSOMWARE ATTACK WITHOUT 2FA ON RESOURCE ACCESS & INTRUSION DETECTION

### RANSOMWARE ATTACK WITH M4IP PROTECTION

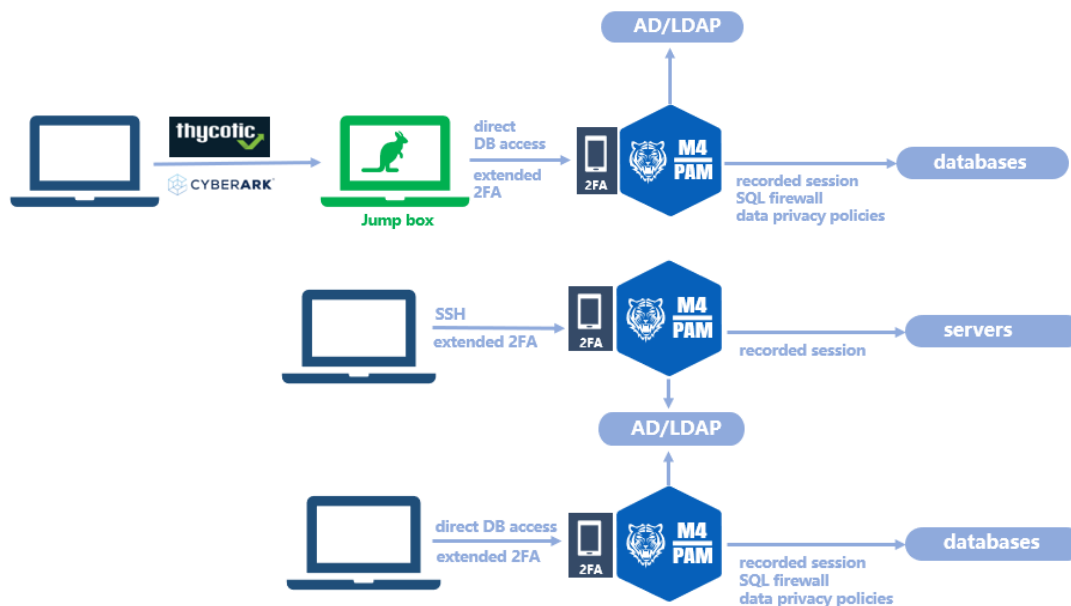

# Zero-trust Security Solutions

About MAMORI.IO

## Protect databases and servers – SSO/2FA direct database and server access

## Self-Host In The Cloud Or On Premise

Don't want all your application, SSH, RDP, and database traffic routed through a 3<sup>rd</sup> party cloud service, then deploy your own mamori server in your data centre or in the cloud at no extra cost.

## Deploy As A Managed Service In Your Cloud Of Choice

Don't want to deploy and manage a high available service, then request a managed mamori server in your cloud of choice. We'll deploy, monitor and manage a mamori service with automatic fail over for you.

## How to Buy

Mamori is licensed on a per-user or per-application annual subscription basis. Servers and services are free to deploy as many as required. Businesses with under twenty staff qualify for a free license (premium support not included).
